

Mira model L in spruce green cladding

Mira

Little wonder

Sometimes simpler is better, and Mira's minimal, space-saving design has everything you need for a calming, enjoyable outdoor sauna without overcomplicating things.

Lightweight components and a compact structure make Mira easy to install on terraces, balconies, and smaller gardens, with no hoisting equipment needed. Two size options allow you to choose the perfect fit: Mira S for up to two users and Mira L for up to four.

And now, Mira brings even more freedom of expression to outdoor wellness. With six new exterior colour options, Mira can blend seamlessly into its surroundings or stand out as a bold architectural element. Whether you prefer subtle earth tones or deeper, more defined colours, there is a Mira for every setting.

Key features

Two sizes, designed to fit

Mira is available in two sizes to suit different outdoor spaces. Mira S is made for the tightest gardens and terraces, while Mira L offers extra width for added comfort.

Eight exterior colour options

With eight carefully selected exterior finishes, Mira adapts effortlessly to its surroundings. Choose a look that blends into nature or creates a bold architectural statement in your garden.

Stylish design

Mira features a beautifully finished, painted and impregnated base frame, combined with thermo-aspen interior cladding and a large clear glass front, creating a light-filled sauna with a clean, modern look.

Flexible interior layouts

Mira L offers three different bench layouts, allowing you to choose how you relax. Whether you prefer a classic straight bench, a more social corner layout, or ergonomic seating, Mira adjusts to your lifestyle.

Warm atmosphere, built in

Integrated LED lighting creates a soft, calming glow that enhances relaxation and brings warmth to every sauna session, day or night.

Easy assembly

Mira's modular, flat-pack construction makes installation possible even in locations with limited access. It's an ideal solution for urban homes, courtyards, and spaces where traditional saunas wouldn't fit.
