

AURUM

Moments of Wellbeing

Indoor & outdoor saunas

**Enter the world
of wellbeing**

Creating moments of wellbeing

We come from the North, where sauna has been part of life for generations - a place to restore both physical and mental balance.

At Auroom, we carry this tradition forward for modern life. Through thoughtful design, natural materials and the experience of heat, creating moments of wellbeing that help people slow down, reconnect and feel restored.

Passion for sauna

For more than 25 years, sauna has been at the heart of what we do.

We combine a deep understanding of timber with design, engineering and modern manufacturing to create wellness spaces that are beautiful, functional and considered down to the last detail.

From ready-designed indoor and outdoor saunas to fully tailored commercial wellness environments, our expertise allows us to find the right solution for spaces, projects and ambitions of every scale.

Made to last

A sauna is built for demanding conditions, which makes every material and every detail matter.

We carefully select timber for its purpose, appearance and performance to create saunas that retain their quality and character over time.

A wide choice of wood species, finishes and design options gives our clients and architects the freedom to make each sauna their own.

Responsibility by design

Our relationship with timber begins at the source.

As part of Thermory Group, Auroom has direct access to responsibly sourced, high-quality timber and decades of expertise in thermally modified wood and sauna materials.

This gives us consistent quality, reliable production and the capacity to deliver projects around the world - from individual private saunas to larger commercial wellness environments.

We believe lasting design is responsible design: made from carefully chosen materials, built for longevity and created to be enjoyed for years to come.

Indoor category

Wellbeing, built into your home

An indoor sauna gives you a dedicated place to slow down, recharge and restore both body and mind.

Whether you are creating a private retreat, a holiday home, a hotel wellness area, a spa or a fitness environment, the sauna can be designed to fit naturally into the space around it.

With a choice of sizes, materials and design options, you can create a solution that feels considered, comfortable and right for the way the space will be used.

From compact settings to complete wellness areas, an indoor sauna brings lasting wellbeing into everyday life.

Lumina

Designed to stand out

Lumina is for those who want the sauna to be a distinctive part of the interior, not simply a functional wellness space.

Its signature two-tone walls, refined detailing and integrated lighting create a warm, architectural atmosphere with a strong design identity. The contrast of materials gives Lumina its recognisable character, while the clean proportions keep the overall look calm and balanced.

Created together with Italian architect Luca Donazzolo, Lumina is a natural choice for design-led homes, hotels and wellness spaces where the sauna is meant to be seen as well as experienced.

Best for: design-conscious projects looking for a distinctive sauna with a strong material and lighting concept.

Lumina technical features

Basic set includes

PANELLING	Horizontal profile SGS9 15 x 120 mm
BASE FRAME	Aluminium (painted black)
EXTERIOR	Glass front wall, back and side walls covered with plywood
INTERIOR	Wall and ceiling panels, benches, backrests
DOOR	Glass door with self-closing hinges and specially designed wooden handles
LIGHTING	LED strips behind the backrests and beneath the lower bench

Suitable equipment

HEATER	Auroom Core, Auroom Alta D, Auroom Alta H
CONTROL UNIT	HUUM UKU WIFI with GLASS control panel (for Auroom Core heater), Auroom Impera (for Auroom Alta D and Alta H heater)
SOUND	Speakers, Bluetooth player

Please see the equipment on pages 62-63.

Available extras

EXTERIOR	Exterior panelling for the side and back walls
INTERIOR	Wooden or stone-board heater guard, floor grids
LIGHTING	Optical fibre lighting effect between the bench frontboards
EXTRAS	Lamps 50 and 80 cm, towel holders 50 and 80 cm, movable benches with lengths 57, 83 and 108 cm

Auroom accessories

Please see the accessories on pages 78-81.

Key features and extras

Two-tone walls

Lumina's wood panelling offers a choice of three two-tone combinations, with the main panels' color contrasting with the grooves between them to create a striking visual impact.

Exterior lamp

These stylish optional exterior lamps are specially designed for Lumina. There are two sizes available, with lengths of 50 and 80 cm.

Towel holder

Lumina's handy optional towel holders are designed and sized to match the exterior lamps.

Exterior panelling

Exterior panelling is available for the side and back walls of the sauna.

Movable bench

Lumina's movable benches come with three size options depending on your needs and wishes, with lengths of 57, 83 and 108 cm.

Lighting effect

An additional optical fiber can be added between the frontboards of the upper bench.

Stone heater guard

This luxurious optional dark grey stone panel extends from the heater up to the ceiling, giving the sauna a uniquely sleek and stylish character.

Flooring

The solid, durable floor grids feature rubber strips that prevent the floor from becoming slippery and protect the wood from direct contact with moisture.

Aluminium base frame

The strong, durable aluminium base frame beneath the sauna walls is well suited to humid environments.

Materials

Aspen panels with dark thermo-alder grooves

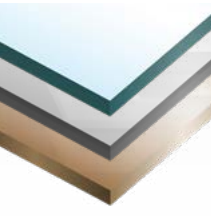

Alder panels with aspen grooves

Dark thermo-alder panels with aspen grooves

GLASS

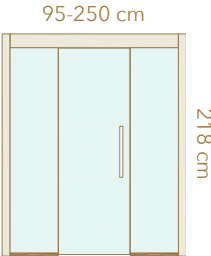

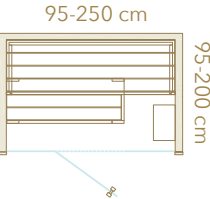

Tempered 8 mm glass Clear/Grey/Bronze

Dimensions

Left or right-handed opening (W x D x H)

95 x 95 x 218 cm	Recommended for 1 user
180 x 120 x 218 cm	Recommended for 2 users
180 x 150 x 218 cm	Recommended for 2-3 users
200 x 150 x 218 cm	Recommended for 3-4 users
200 x 200 x 218 cm	Recommended for 4-5 users
250 x 200 x 218 cm	Recommended for 5-6 users

Nativa

Architectural calm

Nativa is for those who want the sauna to feel like an intentional part of the interior rather than a separate element within it.

Its distinctive relief wall panels and strong horizontal lines give the space an architectural, grounded character, while natural wood brings warmth and softness. Designed together with Italian architect Luca Donazzolo, Nativa is a strong choice for design-led homes and wellness spaces where material, proportion and atmosphere matter equally.

Best for: design-conscious interiors, architectural projects and clients looking for a sauna with a distinctive yet calm character.

Nativa technical features

Basic set includes

PANELLING	Horizontal profile STEP 27 x 64 mm
BASE FRAME	Aluminium
EXTERIOR	Glass front wall, back and side walls covered with plywood
INTERIOR	Wall and ceiling panels, benches (the lower bench is movable in the 180 x 120 cm model), backrest
DOOR	Glass door with self-closing hinges and specially designed wooden handles
LIGHTING	LED strips behind the backrest and beneath the benches

Available extras

EXTERIOR	Exterior panelling for the side and back walls
INTERIOR	Heater guard, floor grids
LIGHTING	Additional LED strip along the lower edge of the backrest
EXTRAS	Movable benches with lengths 57 cm and 115 cm

Auroom accessories

Please see the accessories on pages 78-81.

Suitable equipment

HEATER	Auroom Mura 4.5 kW (180 x 120 cm model), Auroom Mura 6 kW (180 x 150 cm, 200 x 150 cm models), Auroom Alta D 9 kW (200 x 200 cm, 250 x 200 cm models)
CONTROL UNIT	Auroom Impera
SOUND	Speakers, Bluetooth player

Please see the equipment on pages 62-63.

Key features and extras

Lighting effect

An additional LED strip can be added to the lower edge of the backrest, allowing you to change the mood in the sauna.

Heater guard

Nativa's wooden heater guard beautifully matches the other interior materials.

Flooring

The floor is expressly designed to match the overall style of the sauna. The solid, durable floor grids feature rubber strips that prevent the floor from becoming slippery and protect the wood from direct contact with moisture.

Exterior panelling

Exterior panelling is available for the side and back walls of the sauna.

Movable bench

Like Nativa itself, the design of the movable bench is solid and safe. There are two size options depending on your needs and wishes, with lengths of 57 cm and 115 cm.

Materials

Aspen

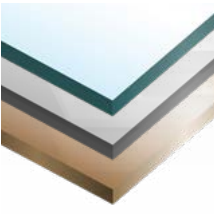

Alder

Thermo-aspen

200 x 200 x 214 cm	Recommended for 4-5 users
250 x 200 x 214 cm	Recommended for 5-6 users

Libera

Uplifting harmony

Libera is designed for projects where flexibility matters.

Choose between a glass or wood front and adapt the overall expression from open and light to more private and intimate. Its clean, restrained design allows Libera to work naturally across different interior styles without dominating the space.

Created together with Italian architect Luca Donazzolo, Libera is ideal when you want the freedom to shape the sauna around the room and the way it will be used.

Best for: projects requiring greater design flexibility and a sauna that integrates easily into different interiors.

Libera Glass

Libera Wood

Libera technical features

Basic set includes

PANELLING	Vertical profile STV Valeura 15 x 90 mm
BASE FRAME	Aluminium
EXTERIOR	Glass (Libera Glass) or wood-panelled (Libera Wood) front wall, back and side walls covered with plywood

INTERIOR	Backrest with built-in LED strip, heater guard, floor grids
LIGHTING	Lamps for the side walls
EXTRAS	External side wall extension module

Auroom accessories

Please see the accessories on pages 78-81.

Key features and extras

Exterior panelling

Exterior panelling is available for the side and back walls of the sauna.

Interior lamp

Specially designed optional extra lamps can be added to the interior walls.

Lighting effect

Libera's backrest comes with a built-in LED strip to bring additional illumination to the sauna room.

Heater guard

Libera's wooden heater guard beautifully matches the rest of the sauna's interior.

Flooring

The solid, durable floor grids feature rubber strips that prevent the floor from becoming slippery and protect the wood from direct contact with moisture.

Wall extension

An extended wall module can optionally be added to Libera's exterior. The standard length of the extension is 112 cm, but it can be longer if required.

250 x 200 x 210 cm	Recommended for 5-6 users

Vulcana

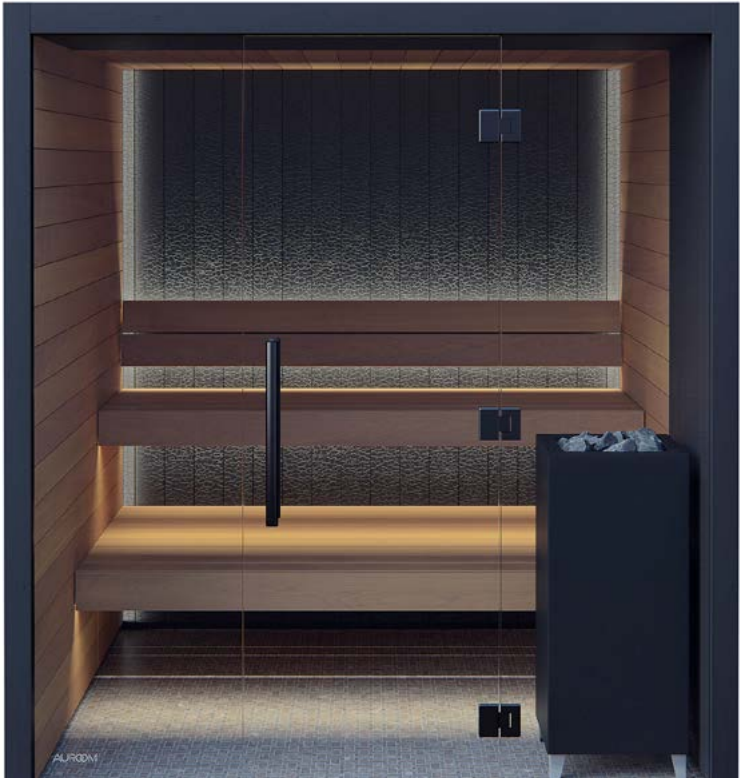

Bold by design

Vulcana is for those who want the sauna to make a clear visual statement.

Warm thermo-aspen is contrasted with dark, textured Ignite cladding to create a rich and distinctive material palette, while the large glass front keeps the space open and inviting. An angled backrest, integrated lighting and considered detailing add comfort to the strong architectural expression.

Vulcana is a natural choice for interiors where the sauna is intended to become part of the overall design concept rather than blend quietly into the background.

Best for: design-led projects looking for a bold sauna with strong material contrast and a contemporary architectural character.

Vulcana technical features

Basic set includes

PANELLING	Horizontal profile STS4 15 x 120 mm, Vertical profile Ignite 15 x 120 mm
BASE FRAME	Aluminium
EXTERIOR	Glass front wall, back and side walls covered with plywood
INTERIOR	Wall and ceiling panels, benches, angled backrest

Auroom accessories

Please see the accessories on pages 78-81.

Key features and extras

Exterior panelling

Exterior panelling is available for the side and back walls of the sauna.

Cladding combination

Vulcana's attractive, deep golden thermo-aspen cladding panels are complemented by exquisite dark walls in Ignite alder.

Auroom x HUUM CORE heater

Designed in cooperation with award-winning producer HUUM, our Auroom Core heater comes with a range of design options and safety features, including a child lock and a door sensor.

Aluminum base frame

The strong, durable aluminium base frame beneath the sauna walls is well suited to humid environments.

HUUM UKU Glass controller

UKU GLASS makes operating your sauna's heating and lighting easier than ever. The control unit offers several safety features and a WiFi connection to the Auroom mobile app.

Lighting effect

Vulcana's backrest comes with a built-in LED strip, with LED lighting embedded in the wall panels adding a bright touch of luxury to the sauna.

Emma

Timeless simplicity

Emma is a straightforward choice for those who value clean design, quality materials and timeless appeal.

Its balanced proportions and understated detailing make it easy to integrate into both contemporary and more classic interiors. A choice of wood finishes and either a glass or wood front allows the look to be adapted while keeping Emma’s character simple and refined.

Best for: clients looking for a versatile, uncomplicated sauna with a classic Auroom feel.

Emma Glass

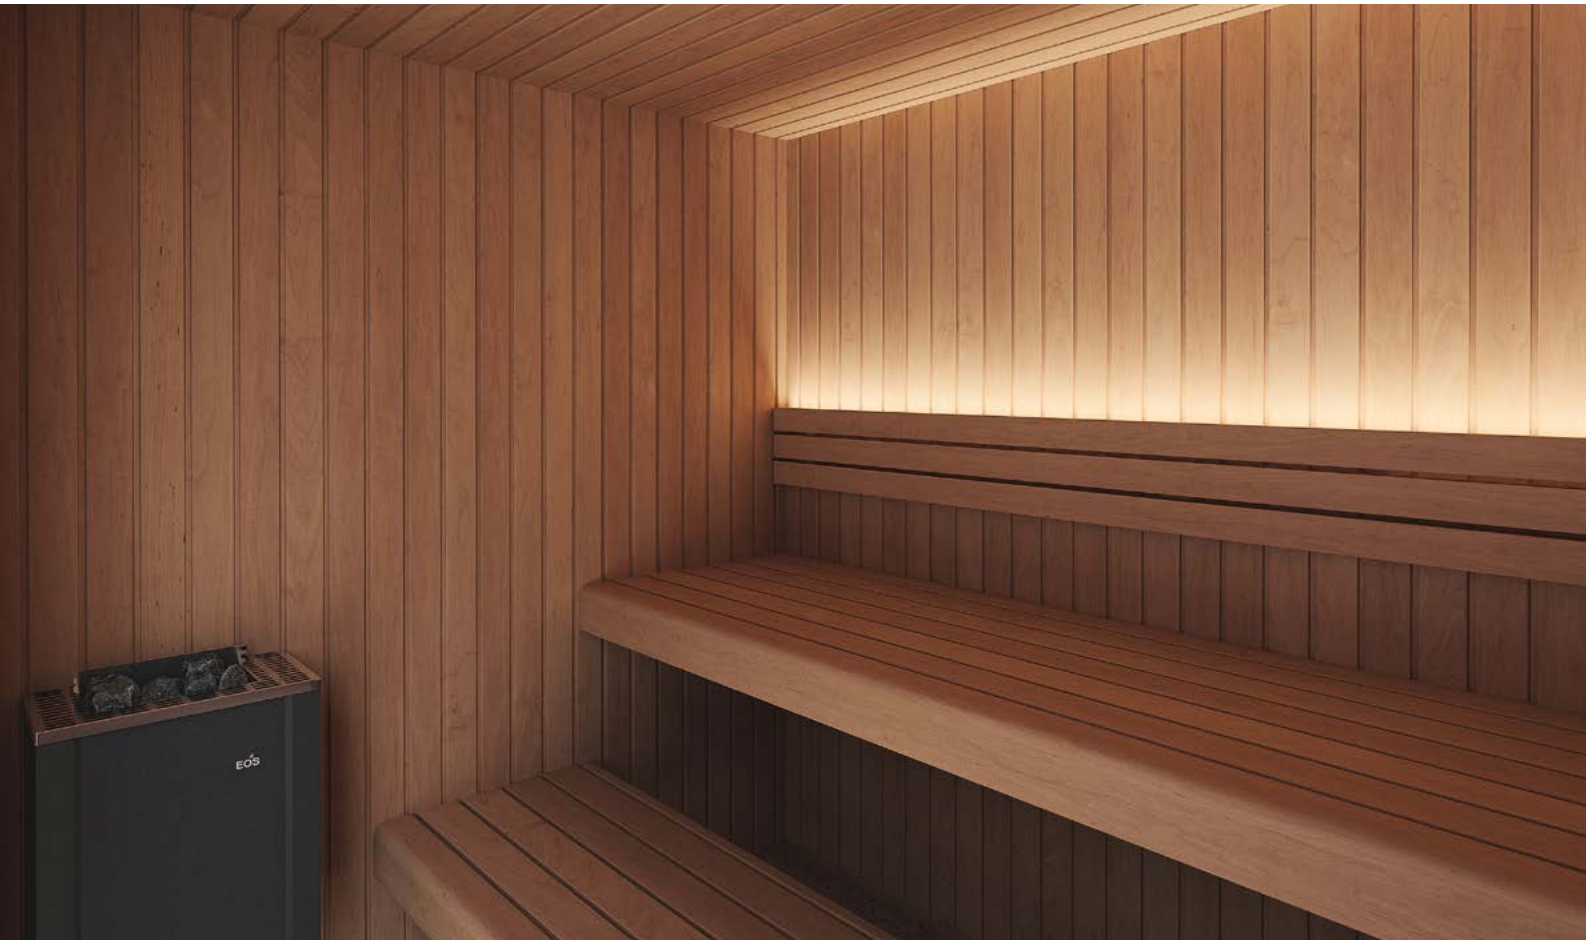

Emma Wood

Emma technical features

Emma Wood

Baia

Compact comfort

Baia is designed for spaces where comfort matters just as much as efficiency.

Its signature curved bench creates a more ergonomic and relaxed sauna experience, while the compact footprint makes Baia easy to integrate into smaller wellness areas, private homes, hotels and other projects where space needs to work harder.

The design can be adapted with a full wood front, a glass front or a glass corner, allowing you to choose between a more private, enclosed atmosphere and a lighter, more open expression.

Best for: compact spaces where ergonomic comfort, flexibility and a refined design are equally important.

Baia Wood

Baia Glass

Baia Glass Corner

Baia technical features

Basic set includes

PANELLING	Horizontal profile STP 15 x 90 mm
BASE FRAME	Wood
EXTERIOR	Glass and wood-panelled front wall, wood-panelled side walls, back wall covered with plywood
INTERIOR	Wall and ceiling panels, flat and ergonomic curved benches, movable bench, backrest, heater guard
DOOR	Glass door and premium handles
LIGHTING	LED strip behind the backrest

Suitable equipment

HEATER	HUUM Cliff, HUUM Steel, Helo Vienna
CONTROL UNIT	HUUM UKU WiFi (HUUM heaters), built-in control unit (Helo Vienna)

Auroom accessories

Please see the accessories on pages 78-81.

Key features and extras

Compact size

Baia is suitable for 1-2 users, which makes the sauna easy to fit into smaller spaces.

Easy installation

Installation is simple and only takes around 4-6 hours with two people.

Ergonomic bench

Baia's ergonomic "wavy" bench looks beautiful and is incredibly comfortable to sit on.

Heater

Choose a heater power of 4.5 or 6.0 kW.

High-quality thermally modified wood

Thermal modification gives the premium-quality aspen wood an attractive darker color and a cosy feel.

Waxed surfaces

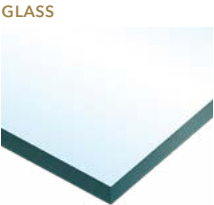

Baia's wooden elements are pretreated with a protective sauna wax.

Cala

Compact tranquility

Cala brings a full traditional sauna experience into spaces where every square metre matters.

Its compact dimensions make it particularly suitable for apartments, smaller wellness areas, guest rooms and renovation projects. Available in different sizes and with either a glass or wood front, Cala combines efficient use of space with warm thermo-aspen interiors and straightforward installation.

Best for: compact spaces and projects where simplicity, efficient use of space and easy installation are priorities.

Cala Wood

Cala Glass

Cala Mini

Cala technical features

Basic set includes

PANELLING	Horizontal profile STP 15 x 90 mm
BASE FRAME	Wood
EXTERIOR	Glass (Cala Glass and Cala Mini) or wood-panelled (Cala Wood) front wall, wood-panelled side walls, back wall covered with plywood

Outdoor category

Wellbeing beyond the indoors

An outdoor sauna creates a natural connection between heat, fresh air and the surrounding environment.

Whether placed in a private garden, at a holiday home, beside a pool, in a hotel or within a larger wellness setting, it extends the way outdoor space can be used - for quiet recovery, social moments and everyday wellbeing.

Auroom outdoor saunas are designed to become part of the landscape around them. Thoughtful proportions, durable materials and considered details make them suitable for different settings, from compact terraces to complete outdoor wellness areas.

Paired with cooling, bathing or relaxation elements, an outdoor sauna can become the heart of a complete wellness experience.

Aurea

Effortless elegance

A more dynamic take on outdoor wellbeing

Aurea brings a sportier, more expressive character to outdoor sauna design.

Its clean architecture is enhanced by a distinctive lighting concept that creates a strong atmosphere after dark, while the sheltered area in front of the sauna adds comfort and extends the experience beyond the sauna room itself. Refined, energetic and contemporary, Aurea is designed for outdoor spaces where the sauna should feel both functional and visually distinctive.

Best for: contemporary homes and wellness spaces looking for a more dynamic outdoor sauna with strong lighting and a distinctive architectural character.

Aurea technical features

Basic set includes

BASE FRAME	Impregnated wooden beams (painted black)
EXTERIOR	Black painted or oiled natural thermo-spruce cladding
INTERIOR	Wall and ceiling panels, benches, bench skirt, backrest, floor grids, waterproof EPDM floor covering
DOOR AND WINDOWS	Glass with black anodized anti-vibration soft seals
LIGHTING	LED strips behind the backrest

Auroom accessories

Please see the accessories on pages 78-81.

Key features and extras

Refined design with premium materials

Crafted from brushed thermo-radiata pine and finished with a waxed alder interior, Aurea combines natural materials, durability, and contemporary outdoor sauna design.

Ambient designer lighting

Integrated LED lighting behind the backrest, beneath the benches, and across the terrace creates a warm and relaxing atmosphere for a premium sauna experience.

Flexible layouts for comfort

Choose between straight or corner bench layouts, both featuring a spacious three-level bench system designed for comfort, functionality, and authentic Nordic sauna bathing.

Auroom Core setup included

Every Aurea outdoor sauna comes equipped with the Auroom Core heater, UKU Glass control unit, black heat shield, and engraved heater guard for a refined and seamless finish.

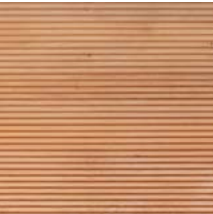

Two models, two floor options

Available as the classic Aurea or the slanted-front Aurea Ascent. Both models are offered in versions with or without an integrated floor, making installation adaptable to different outdoor settings and architectural needs.

Mira

Made to fit

Mira is designed for those who want the freedom to choose the outdoor sauna that fits their space, style and way of using it.

Available in two sizes, seven exterior colours and three different bench layouts, Mira can be configured from a compact private sauna to a more generous space for sharing. Its clean, contemporary design makes it easy to place in a wide range of outdoor settings while still giving you plenty of room to make it your own. Fits everywhere - to balconies, gardens, pool side.

Best for: anyone looking for a flexible outdoor sauna with multiple size, colour and layout options.

Mira technical features

Basic set includes

Garda

Simply satisfying

Garda brings together a clean architectural form, durable construction and the freedom to adapt the exterior to its surroundings.

Its restrained design works equally well in contemporary and more natural settings, while different exterior finishes and layout options make it easy to integrate into a wider outdoor concept. Garda is a practical choice when you want a substantial outdoor sauna without unnecessary complexity.

Best for: private and hospitality projects looking for a versatile, durable outdoor sauna with a clean, understated design.

Garda technical features

Terra

Your outdoor wellness haven

Terra is for projects that need more than a sauna alone.

Its contemporary architecture can be configured as a dedicated sauna or extended with space for changing, relaxing and spending time between sauna sessions. Different sizes, materials and finishes allow Terra to become part of a broader outdoor wellness concept rather than a standalone cabin.

Best for: larger private, hospitality and wellness projects looking to create a complete outdoor wellness environment around the sauna.

Terra technical features

Basic set includes

BASE FRAME	Impregnated wooden beams (painted black)
EXTERIOR	Black painted or oiled natural thermo-pine cladding
INTERIOR	Benches, backrests, waxed thermally modified wall and ceiling panels, floor grids, waterproof PVC floor covering
DOOR AND WINDOWS	Double-glazed tempered glass door, triple-glazed tempered glass windows with UV protection and pine frames
LIGHTING	LED lights beneath the benches

Key features and extras

Terra Small

Terra Small is the smaller of the two options, with a comfortable, sumptuous sauna space that has everything you need for a nice refreshing steam.

Two colour options

Terra's exterior cladding comes in thermo-pine with a choice of a natural oiled or black finish.

Terra Medium

Terra Medium is a larger model for those who need that little bit of extra room, with a spacious changing and relaxation area in addition to the sauna.

Arti

Simply reinvigorating

Arti brings the character and comfort of a larger outdoor sauna into a more compact form.

Designed as a complete freestanding sauna with its own terrace, generous glazing and a warm timber interior, it creates a dedicated wellness destination without requiring the space of a larger model. Its robust construction is made for year-round outdoor use.

Best for: projects looking for a complete premium outdoor sauna experience within a relatively compact footprint.

Natura

Naturally reinvigorating

Natura is designed for those who want the sauna experience to extend beyond the sauna room itself.

A generous terrace and large front glazing create a strong connection with the surrounding landscape, while the warm timber interior offers a sheltered and calming space within. Designed together with Italian architect Luca Donazzolo, Natura turns the sauna into a place to stay, slow down and experience the outdoors.

Best for: gardens, retreats and destination wellness settings where nature and the surrounding view are an important part of the experience.

Key features and extras

Exterior

Natura's exterior cladding, made from thermally modified, brushed and painted Nordic spruce, is designed to withstand severe weather conditions. The walls, floor and roof are efficiently insulated, while the solid roof construction can bear heavy snow loads.

Interior

All of the sauna's interior elements are made from high-quality thermo-aspen.

Terrace and dressing room

The sauna's integrated outdoor terrace and dressing room have LED spotlights. Inside, warm white LED striplights are mounted behind the backrests. The lights are dimmable and operated with a remote control unit.

Flooring

The solid, durable floor grids feature rubber strips that prevent the floor from becoming slippery and protect the wood from direct contact with moisture.

Quu

Boldly refined.
Elegantly different.

Introducing Quu – a new pinnacle of luxury outdoor sauna design by Auroom. Built for those who seek more than just function, Quu is an architectural statement where premium materials, serene spaciousness and bespoke design come together in perfect balance.

Wrapped in our signature Ignite cladding – a thermally modified, brushed and black-painted wood surface – Quu commands attention from the outside. Inside, it offers a calming sanctuary, defined by clean lines, panoramic views, and floating benches crafted from thermo-radiata pine.

Whether you choose the standard Quu, Quu Wave with sculptural interior or develop your own bespoke layout, this sauna adapts effortlessly to your aesthetic vision and wellness needs.

Key features and extras

Stand out with striking design

The exclusive IGNITE exterior cladding gives QUU a bold, premium character that transforms any outdoor setting.

Make it truly yours

Choose from refined design options like the elegant “Wave” bench layout, or personalize the interior fully to fit your taste and space.

Experience natural luxury

Enjoy the tactile beauty and warmth of thermo-radiata pine and thermo-ash, chosen for their durability and rich finish.

Built to withstand any weather

Thanks to a strong CLT structure and Kingspan insulation, Quu is ready for year-round use - no matter the season or setting.

Relax in spacious comfort

Panoramic glass walls and floating benches create a serene, open atmosphere to unwind and recharge.

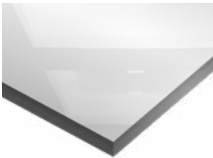

Modern comforts included

Ambient lighting and a built-in audio system offer the finishing touches to elevate your sauna experience.

Enhance your experience

The finest sauna moments are shaped by the details. From practical accessories and essential equipment to refreshing outdoor showers and the invigorating Cold Plunge, each element helps create a more complete and personal wellness experience.

Cool down beneath the open sky, take a revitalising dip after the heat, or simply enjoy the comfort of thoughtfully designed accessories.

These additions bring convenience, style and a sense of ritual to every sauna session.

Whether you are creating a private retreat or hosting friends and family, the right finishing touches turn your sauna area into a place to relax, recharge and enjoy the outdoors.

VelAqua

Refresh, revive, reconnect.

Whether you have just stepped out of the sauna, finished a morning swim, or simply want to reconnect with nature, VelAqua turns an everyday shower into a refreshing outdoor ritual.

VelAqua is a versatile outdoor shower concept with an elegantly minimal form and natural wood finish. It brings a sense of calm and refinement to any outdoor wellness setting, designed to complement an outdoor sauna, pool or terrace, or to stand independently as a shower wall beside an existing sauna or wellness area.

The standard solution connects easily to hot and cold water supplies. For a more streamlined installation, the fully integrated WATERY Water Module is available as an optional premium solution. The images illustrate selected applications and configuration possibilities.

VelAqua technical features

Outdoor Shower

WALL CLADDING	TWW CAR10 26 × 140 Stripe – Thermory Stripes thermo-spruce CAR10
DECKING	TSR D4 thermo-ash
SHELF	Illuminated quartz shelf, 5720 Darcrest
SHOWER SYSTEM	Damixa concealed shower system in matte black
WATER MODULE	standard connection to the customer’s hot and cold water, or optional WATERY complete water system.

WATERY Water Module

The WATERY module provides a smart and efficient solution for managing the outdoor shower’s water system. Water temperature and pressure can be easily adjusted, helping to optimize both water and energy consumption. All fittings and connections are integrated within the module, eliminating the need for press fittings. The entire system can be conveniently shut off from a single valve.

The module comes pre-configured and includes a QR code with easy access to installation and maintenance instructions.Delivered fully prepared and ready for immediate use.

Please note: The water system is not suitable for use in sub-zero temperatures.

Key features and extras

Luxurious outdoor refresh

A stylish and functional shower solution, perfect for rinsing off after a sauna session or simply cooling down on a warm day -designed to bring the spa experience outdoors.

Premium natural materials

Crafted with Thermory thermo-spruce cladding and thermo-ash decking, VelAqua showcases durable materials that age beautifully and blend seamlessly with nature.

Sleek integrated water module

Everything you need is built into one smart unit: a matte black recessed Damixa faucet and shower system, pre-configured for easy installation and seamless operation.

Intuitive and efficient use

Simple hose and power connection, adjustable water temperature and pressure, and a one-tap seal-off function make VelAqua as practical as it is beautiful.

Flexible setup options

VelAqua is available with or without a base, adapting to your layout and needs. Whether paired with an Auroom sauna or standing on its own, it delivers effortless outdoor refreshment.

Built-in LED lighting

Subtle lighting illuminates the quartz shelf, creating a refined atmosphere and highlighting the shower’s clean, modern lines - even after dark.

Please note: The water system is not suitable for use in sub-zero temperatures.

Key features and extras

Cold water recovery ritual

VelEira delivers a crisp and refreshing cold plunge experience, with water temperatures reaching approximately 3°C. Perfect after sauna sessions, workouts, or as part of an everyday wellness routine supporting recovery and reset.

Flexible installation options

VelEira can be placed on a terrace as a standalone product or recessed into the terrace for a more integrated look.

Insulated construction

Crafted from high-quality fiberglass with PUR thermal insulation, VelEira is designed to maintain stable water temperatures efficiently. The metallic black finish and 330-liter capacity create a sleek and comfortable cold plunge experience for everyday use.

Integrated water chiller

A compact water chiller helps maintain the desired water temperature for a consistent cold plunge experience.

Designed to match Auroom saunas

The exterior cladding can be finished in the same style or coordinated with any Auroom outdoor sauna, creating a seamless and cohesive wellness space.

Built-in LED lighting

Subtle integrated lighting around the upper rim and side wall adds atmosphere and makes VelEira a design element even after dark.

Customise your wellbeing

Your sauna should feel right for the way you use it and the space around it. Choose the equipment, materials and finishing details that shape the look, atmosphere and experience. And when a standard model is not enough, our tailor-made team can take the idea further.

Equipment

The right equipment defines how your sauna feels and how easily it fits into everyday use. Choose the heating and control solution according to the sauna, the project and the type of experience you want to create.

Heat & climate

Choose from trusted heater and control solutions for different sauna sizes and climates - from classic hot and dry heat to softer, more humid options where suitable.

Infrared

Duetto infrared panels can add gentle radiant heat to the sauna experience. Surface-mounted installation makes the system flexible to integrate into Auroom models.

Light & sound

Lighting and sound can be selected to support the atmosphere of the space - from subtle functional lighting to a more immersive wellness experience.

Accessories

Small details make the sauna experience feel complete. Practical essentials and tactile finishing touches add comfort, function and a sense of ritual to every session.

Pail & ladle 6 L

Unique Finnish design by Annika Korpela. Made from lightweight and durable black-painted aluminium with wooden handles. The 6-litre pail and matching ladle combine practical functionality with a refined sauna aesthetic.

Sand timer

15-minute sand timer designed to help you keep track of time during your sauna session. Filled with fine white sand and easy to follow at a glance.

Aroma set a'10 ml

100% natural essential oils created to enhance the sauna experience with refreshing aromas. The set includes five 10 ml scents: Eucalyptus, Minty Orange, Vitality, Grapefruit & Bergamot, and Energy.

Thermo-hygrometer

Diameter 13 cm

Special and unique Auroom design. The case is made of black powder-coated stainless steel. Mineral glass cover.

Thermometer

Diameter 13 cm

Distinctive Auroom design, featuring a black powder-coated stainless steel case and a mineral glass cover.

Thermometer 12x12 cm

Minimalist sauna thermometer made from alder wood and finished in black. A natural material combined with a clean, understated design that complements modern sauna interiors.

Thermo- & hygrometer 24x12 cm

Combined thermometer and hygrometer made from alder wood and finished in black. Measures both temperature and humidity while adding a simple, natural design element to the sauna interior.

Linen Seat Cover Set

46x51 cm, 3 pcs / 45x160 cm, 2 pcs

Premium sauna seat cover set, designed for comfort and a refined sauna experience. Made from natural linen.

Towel 100x150 cm

The luxury-sized towel is quietly soft and made of 100% cotton.

Sauna Hat

Sauna hat protects your head, ears and hair from overheating during sauna sessions. The sauna hat is made of 60% linen and 40% cotton.

Sauna Pillow 20x38 cm

Pillow textile: 60% linen and 40% cotton. Filling: siliconized polyester filling, it's heat resistant and well suitable for sauna use. Machine-washable.

The beauty of choice

To build Auroom saunas, we use both thermally modified and natural timber. You can thermo-treat, brush or paint your sauna.

Our thermo-treatment offers great visual effects: the charming brownish colour can be lighter or darker, depending on the wood type and heating procedure.

The use of painted wood creates another range of options. There are a lot of beautiful tones, so let your imagination take flight.

Our saunas meet your needs

Auroom saunas can also be adjusted for non-standard circumstances thanks to our highly skilled design and development team, who can quickly rework existing models or devise completely new solutions. So if you have a family member with special needs or a project that requires unique solutions, don't hesitate to contact us. We will always find the best and most comfortable solution.

Boost your health with infrared

Unlike traditional infrared saunas don't heat the air around you. Rather, they use infrared lamps to directly warm your body's core temperature. Infrared sauna lovers say that the heat penetrates deeper than the warmed air from conventional saunas. This allows them to experience a more intense sweat at a lower temperature.

If you don't want to give up your regular sauna we offer the best of both worlds. A dual sauna is the perfect combination of the traditional sauna and the new-generation infrared sauna. If you are interested, then contact us and let's see what we can offer you.

WELLBEING, SHAPED AROUND YOUR SPACE

Tailor-made

Some projects call for a solution designed entirely around the space, the architecture and the way it will be used.

Auroom tailor-made saunas give you the freedom to define the dimensions, materials, layout, equipment and overall expression of the sauna. From distinctive private interiors to

demanding commercial wellness projects, each solution is developed to integrate naturally into its surroundings while balancing design, comfort and functionality.

The result is a sauna created specifically for the project, without compromising the experience.

Freedom in design

From compact 0.9 m² solutions to expansive 100 m² wellness spaces, we create saunas without limits. Whether you are looking for something minimal and architectural or bold and entirely unique, we bring your vision to life.

Technology, seamlessly integrated

Every sauna is tailored to your preferences. We combine traditional sauna, infrared, and steam solutions into one cohesive experience. All technologies are carefully integrated to support both performance and aesthetics.

Materials and details that matter

We work only with selected, high quality materials. From premium wood choices to lighting and sound solutions, every detail is thoughtfully designed to create a refined and lasting experience.

For every space

Our tailor made saunas are created for both private and commercial use, indoors and outdoors. From urban homes to luxury retreats and wellness centres, each project is designed to fit its environment perfectly.

From idea to installation

We guide you through the entire journey. From the first concept and design to engineering, production, and installation, our team ensures a smooth and inspiring process.

Let us create your sauna

Whether you already have a clear vision or just an idea, we are here to help shape it. Share your project with us and take the first step towards your tailor made sauna sending us an inquiry or being in contact.

Our clients come first

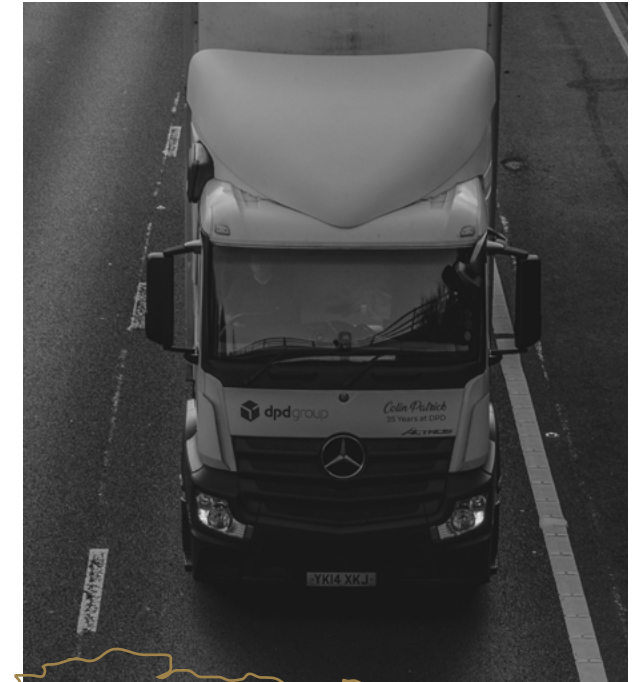

At Auroom, our clients always come first. We look after our sauna users and do everything we can to ensure that the quality of our products is uncompromising. To this end, we are always open to feedback from our clients and respond to all questions and concerns quickly.

The flexible and well-organised way we go about production enables us to offer the quickest delivery times in the industry.

All Auroom deliveries are insured and protected against accidents. In larger markets we are represented by approved local resellers who can help at every stage.

Our resellers are global

Auroom has a wide network of resellers across the globe. Thanks to Thermory as the world's leading producer of thermally modified timber and sauna materials, our saunas are loved all over the world. We are always willing to add new resellers to help our products spread even further.

Would you like to create a sauna with us or become an Auroom reseller?

Have our saunas and wellness solutions sparked your interest? If you'd like to collaborate with us on a sauna project or become a reseller for our existing models, please contact us at info@auroomwellness.com
